

Catalog No. WCS-90

"A powerful intestinal antiseptic and tumoricidal agent"

Based on many years of clinical use and data from numerous clinical and experimental studies, Clorpactin WCS-90 has been shown to have numerous advantages as a topical chemotherapeutic agent:

- Active against a broad spectrum of microorganisms, including Gram-negative and Gram-positive bacteria, fungi, yeast, mold, viruses and spores, when employed topically in the recommended concentrations.
- Tumoricidal activity.
- No adverse effect on normal tissue or epithelial growth at these same concentrations.
- No evidence of the development of resistant organisms.
- No systemic toxicity, as long as the recommended concentrations are not exceeded.
- No reported cases of the development of intolerance or allergic sensitivity.

**DIRECTIONS FOR USE:**

Add one bottle of powder (2 grams) for every 500 mL of lukewarm sterile water or saline to achieve a 0.4% solution. Stir or shake for several minutes. Irrigate the bowel with this solution using a syringe or an IRRIGUT® intestinal irrigator.

**CAUTION:**

Clorpactin WCS-90 should **never** be used as a powder. The strong oxidizing power of the powder will cause burns that can result in necrotic tissue. It should be used as a solution only, and in the concentrations specified. Not for systemic use.

Five 2-gram bottles per box (10 grams net wt. per box)  
12 boxes per carton  
Store under refrigeration
